Electrical Services Policy

Electrical service into the circuit breakers panels is located inside each Unit. Such service shall be 220 volts at 110 amps maximum capacity. Presence of any of the following devices, whether used not in a Member's Unit, shall constitute a violation of this policy:

- 220 volt devices without prior written approval by Board;
- electric ranges;
- electric heaters;
- electric dryers; and/or
- electric water heaters.
