Satellite Dishes / Antennas Policy

Satellite dishes/antennas may not be attached to any Association buildings, including roofs, overhangs and/or chimneys. Members wishing to install a dish must obtain Association approval and proper permit. Along with each permit, they must submit a diagram of where and how the dish will be installed. Under no circumstances can the wiring go through the siding of a Unit. Satellite dishes/antennas may be attached to a shed or a pole within a Members' rear yard with wiring proceeding through the foundation and/or brick coat and not access panels and/or crawl space vents.
